

BR_FILES – File Services

Robin Lamacraft 2017-03-22

SCOPE

This module must be used to locate or create file folders in the Server or Client file system. Also to save content as a named file, or to open, copy, rename an existing file. This includes copying files between the Client and Server file systems.

ACTIONS THAT USE THE FILE SERVICES (incomplete list)

- Locate where an output file is to be stored
- Locate from where an input file is to be opened
- Retrieve properties of a file.

ACTIONS

The fundamental operations are:

1. Return existence of a file
2. Return access properties for a file
3. Open file for writing
4. Open file for appending.
