

# GUI Icon-Information

## Revision history

2018-05-12	Rod Thompson	Original draft
------------	--------------	----------------

## SCOPE

Icons are used extensively throughout the HRE application, in all window displays.

This document details use of the 'Information' icon.

Each icon is in fact a button control, with a unique image that identifies its use without additional descriptive text

## LOOK AND FEEL

Colour icons may be used in the main application window. (possible issues if user changes background palette)

Black & White icons will be used in sub-windows.

## LABEL

Information

## IMAGE

	
File: Information-V2b-1(24x24).ico	

## ACTIONS

Use of the icon button will open a new window, providing a non-editable summary for the item.

The window has a close button for that purpose.

Focus remains on the information window until closed.

A single operation of the icon button causes the defined action. Subsequent operations have the same action once the information screen is closed.

## HOVER HINT

Information

## USED BY

Called by HRE windows

GUI_Select Configuration	
--------------------------	--

## DATA CONTROLLED BY THIS MODULE

1. None.

## REQUIRED DATA CONTROLLED BY OTHER MODULES
