

# GUI Icon-Output

## Revision history

2018-05-17	Rod Thompson	Original draft
------------	--------------	----------------

## SCOPE

Icons are used extensively throughout the HRE application, in all window displays.

This document details use of the 'Output' icon.

The enable selection of either:

- Output to PRINTER
- Output to FILE

Each icon is in fact a button control, with a unique image that identifies its use without additional descriptive text

## LOOK AND FEEL

Colour icons may be used in the main application window. (possible issues if user changes background palette)

Black & White icons will be used in sub-windows.

## LABEL

Reminder

## IMAGE

## ACTIONS

Selection of this button will open a new WINDOW OUTPUT window displaying information related to this function; and allowing the user to 'Output to a Printer', or 'Output to File'.

A single operation of the icon button causes the Output window to Open, transferring focus, while that Window is open.

## HOVER HINT

Output

## USED BY

## DATA CONTROLLED BY THIS MODULE

1. Reminder information text

## REQUIRED DATA CONTROLLED BY OTHER MODULES
