

BR_REMINDER – Reminder Services

Revision history

2017-03-22	Robin Lamacraft	Original draft
2018-04-17	John Lucas	Minor edits
2018-06-19	Rod Thompson	Revise REQUIRED SERVICES - Dependencies

SCOPE

This module must be used to store and evaluate reminders to be displayed on the screen. Reminders are user-created text to aid the user to be consistent in data entry. Reminders in TMG were associated with a number of screen data entry screens or complex data editing screens. In HRE, a Reminder can be located like TMG on a screen basis. In some situations they can be additionally associated with particular sub-sections of a screen.

ACTIONS

The text of a reminder can be an encoded string in RTF format to provide layout and formatting with these operations:

1. Define a new Reminder
2. Each Reminder has a unique HRE_ID
3. View or Edit a Reminder
4. Check before deleting a Reminder that there is no action that uses that Reminder.

USED BY:

GUI_Reminder.

DATA CONTROLLED BY THIS MODULE:

1. User Reminder Database Table.

REQUIRED DATA CONTROLLED BY OTHER MODULES:

1. HRE_ID
2. User Translation
3. Application GUI Index Table
4. Panel Configuration.

REQUIRED SERVICES – Dependencies

First-Order Dependencies	Second-Order Dependencies	Higher-Order Dependencies
07.01 BR_EncodedString	NIL	
BR_AppData		
07.02 BR_EntityLink	Needed	
BR_UserTranslation		

APPLICATION PROGRAMMING INTERFACE (API)

1. Need Details.

WARNING CONDITIONS

1. Need details of the condition that raised the warning, example message and possible next steps.

ERROR CONDITIONS

1. Need to record the condition that raised the error, example message and possible next steps.
