

# GUI\_ProjectDelete – Delete a Project

Robin Lamacraft 2017-06-21

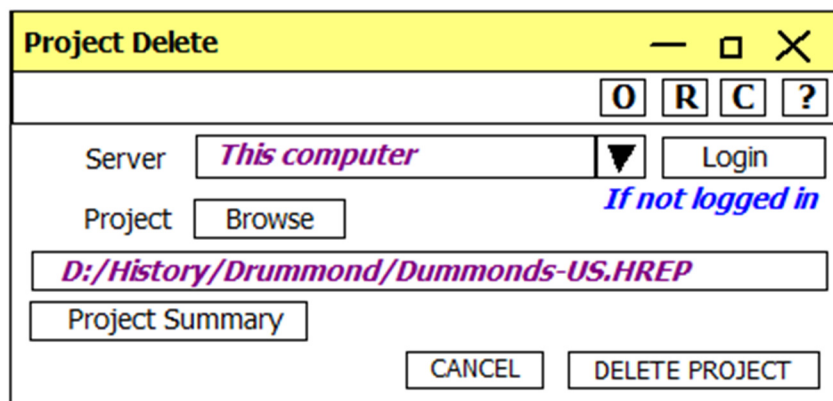

## SCOPE

This GUI module is called from the Main Menu (GUI\_Interface) to delete an existing project.

## LOOK AND FEEL

The screen has several parts:

- The upper right icon buttons provide the following universal features:
  - “O” enables Output of the Recent Projects list by sending the contents of the Recent Projects tabular display to a file or to a printer.
  - “R” displays the Reminder content for this screen
  - “C” enables the user to create and retrieve Configurations of this screen’s layout
  - “?” displays context Help about the use of this screen
- The “Server” selection list allows selection from various servers known to this installation of HRE. On selection of a Server, the “Login” button allows the user to access that server (if the user is already logged into that server the “Login” button will be hidden). NOTE: If this is an isolated usage of HRE where project files are only used from the same computer then the server aspects of this GUI will not show any server-related elements. There can be a one user environment. If a second computer is used to access those project files over a local network then the login on either computer must invoke the shared server mode.
- The Project “Browse” button allows the user to select the project file to be deleted
- The “Summary” button opens the GUI\_ProjectSummary module to display the details of the selected project
- The “DELETE PROJECT” button initiates the deletion of the chosen project
- The “CANCEL” button forces exit without a project deletion action.

## ACTIONS

The fundamental operations are:

1. Open the screen according to its saved screen Layout (BR\_PanelConfig)
2. Allow the user to search for a project file to be deleted
3. If the project file is in use, then:
  - prevent any new logins
  - warn users of that project of this action
  - raise error with this user of project use conflict.

## USED BY

All HRE users.

#### **DATA CONTROLLED BY THIS MODULE**

1. None.

#### **REQUIRED DATA CONTROLLED BY OTHER MODULES**

1. None.

#### **REQUIRED SERVICES**

1. GUI\_ProjectSummary
2. BR\_PanelConfig
3. BR\_File
4. BR\_Project.

#### **APPLICATION PROGRAMMING INTERFACE (API)**

1. Single call with no parameters.

#### **EVENT ACTIONS**

1. Need Details.

#### **WARNING CONDITIONS**

1. Need details of the condition that raised the warning, example message and possible next steps.

#### **ERROR CONDITIONS**

1. Need to record the condition that raised the error, example message and possible next steps.
