2019-04-05	Don Ferguson	Replace mockup with draft screen
2019-11-29	Don Ferguson	Complete rewrite to reflect use of Oracle Help for Java v12

SCOPE

This GUI module displays the text of Help for the screen or component invoking this method.

LOOK AND FEEL

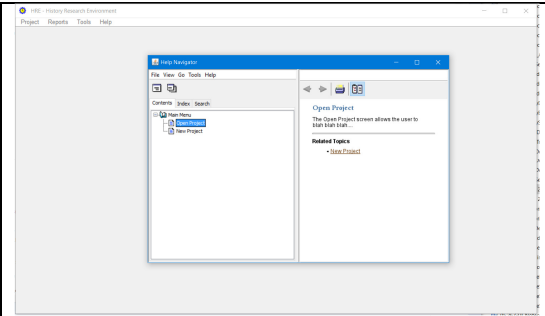

GUI Help Windows – sample data only

The Help window has 2 sections:

- Help Navigator section on the left is a scrollable, resizable list. This list shows the topics that are relevant to the window from which Help was opened. Double-clicking on a topic causes the Topic Window area to be shown with the relevant content.
- Topic Window section on the right is scrollable. In this space the description of the currently selected topic is displayed.

On screen location, Shape, Size, Color, Layout etc. determined by Oracle implementation.

USED BY: any GUI module with a Help capability.

ACTIONS

The fundamental operations are:

1. Open the Help window
2. Populate the display with list of topics for that window
3. Perform content updates according to topic selection.

If used in context-sensitive mode, only the selected topic window is displayed.

DATA CONTROLLED BY THIS MODULE

None.

REQUIRED SERVICES – Dependencies

First-Order Dependencies	Second-Order Dependencies
Oracle help functions included in the Oracle Help JARs provided in the OHJ JDK	Oracle- provided ICE browser system for displaying the Help topics

APPLICATION PROGRAMMING INTERFACE (API)

Parameters passed to this module are:

1. Window instance of calling screen
2. Component ID of invoking component (context-sensitive only)
3. Help topic ID to be displayed (context-sensitive only).

LOGGING

General use of this module will not create log entries.

EVENT ACTIONS

- 1) Keyboard actions
Not applicable
- 2) Mouse actions
Drag and drop mouse actions to move and resize the window
Left key

- a. Double-Click on an item in the Navigator panel selects that item
- b. Click on the 'Close' icon closes the window.

WARNING CONDITIONS

- 1. As defined by Oracle implementation – includes errors of improper Helpset file formats.

ERROR CONDITIONS

- 1. As defined by Oracle implementation – includes errors of improper Helpset file formats.
