

GUI_UserLanguageDelete – User Language Delete

Robin Lamacraft 2017-03-09

SCOPE

This GUI module displays a screen to delete a User Language.

LOOK AND FEEL

The screen has 4 horizontal parts:

- The heading section shows the name of the User Language
- A collection of buttons including “Configure”, “Delete”, “Apply”, “Cancel” and “Output”:
 - “Configure” opens a screen that allows the creation and re-use of screen content and layout
 - “Delete” starts a search to check that it is possible to delete User Language without causing inconsistency in the database:
 - This search lists on the screen the other objects that require the User Language to continue to exist
 - The resultant scrollable table has columns HRE-ID, Language Name
 - This search has 2 possible outcomes:
 - “Apply” is enabled on clicking it as no dependent objects were found. “Apply” removes the Application Language
 - “Output” - If there are other objects that require the User Language to continue to exist, then “Output” can save this list for analysis as a file or to print it. There may be several reasons the User Language can’t be removed.
 - “Cancel” does not delete the User Language

[Needs a mockup diagram here]

ACTIONS

The fundamental operations are:

1. Open Screen according to its saved Screen Layout (BR_PanelConfig)
2. Populate the property editor pane with values for the selected object
3. Populate the heading
4. Perform the search
5. Delete the Entity
6. Output the result of the search.

USED BY:

Tools > User Language > Delete

DATA CONTROLLED BY THIS MODULE

None.

REQUIRED DATA CONTROLLED BY OTHER MODULES

HRE-ID.

REQUIRED SERVICES

1. GUI_PanelConfigEdit
2. GUI_FieldTranslationEdit
3. GUI_Output

4. BR_Setting
5. BR_PanelConfig
6. BR_
7. BR_EntityLink.

APPLICATION PROGRAMMING INTERFACE (API)

1. **Need Details.**
