

BR_User – User Services

Robin Lamacraft 2017-03-24

SCOPE

This module must be used to create, edit, delete and retrieve data about a User of the current Project. Each User has the properties defined under “Data Under Control of this Module” below.

ACTIONS

The normal user operations are:

1. To show a user their own details (minus password)
2. To allow that user to change their information.

The admin user operations are:

1. To show any user’s details (minus their password)
2. To allow that admin user to change any information
3. To create or delete users
4. To manage the recovery or replacement of a user’s password.

USED BY

1. Entity Links services.
