

# GUI\_HistoricalInterval – Historical Interval

Robin Lamacraft 2017-04-06

## SCOPE

This GUI module displays a modal screen to view, enter or edit an Historical Interval value. It is only opened from another screen when the user needs to enter a Historical Interval value that may require some assistance or calendar conversion. Most Historical Interval values can be entered as field text values.

## LOOK AND FEEL

The screen has 4 horizontal parts:

- “Configure” button to select, edit or save a configure of this screen
- A scrollable property editor pane that is populated with the configured Interval properties.

The property editor pane has 2 columns:

- Column 1: the label of the Interval element
- Column 2: the current value of that Interval element.
- Right-clicking on a row of the property editor shows a context menu that includes:
  - Show description
  - Select value format
  - Show constraint rules.

[Needs mockup diagram here]

**USED BY:** Any screen that may enter or edit a Historical Interval value.

## ACTIONS

The fundamental operations are:

1. Open screen according to its saved Screen Layout (BR\_PanelConfig)
2. Populate the property editor pane with values for the selected object
3. Edit a field
4. Undo Edit
5. Save new values.

## USED BY

Nothing else.

## DATA CONTROLLED BY THIS MODULE

None.

## REQUIRED DATA CONTROLLED BY OTHER MODULES

HRE\_ID.

## REQUIRED SERVICES

1. GUI\_PanelConfigEdit
2. GUI\_FieldTranslationEdit
3. BR\_HistoricalDate
4. BR\_Setting
5. BR\_PanelConfig
6. BR\_EntityLink.
