GUI_Icon-Vertical Reorder (Swap)

Revision history

2018-05-21	Rod Thompson	Original draft

SCOPE

Icons are used extensively throughout the HRE application, in all window displays.

This document details use of the icon used to 'reorder' data in a list (vertically).

In its simplest form it is used to 'swap' two items

Each icon is in fact a button control, with a unique image that identifies its use without additional descriptive text

LOOK AND FEEL

Colour icons may be used in the main application window. (possible issues if user changes background palette)

Black & White icons will be used in sub-windows.

  File: Vertical Reorder-Ver1(24x24).ico	

ACTIONS

Swap

In its simplest form, this control is used to *swap* two items that are vertically displaced.

Selection of this button will case the top item to move to the lower position, and that which was in the lower position to be moved to the upper position. The process is repeated with each operation of the button.

Re-order

Select two items in a list to re-order. (incomplete)

HOVER HINT

Swap

USED BY

GUI_Message Editor	

DATA CONTROLLED BY THIS MODULE

1. List data

REQUIRED DATA CONTROLLED BY OTHER MODULES

1. ????

REQUIRED SERVICES

    1. ????

APPLICATION PROGRAMMING INTERFACE (API)

    1. ????
