GUI_Output – Save text or print table

Robin Lamacraft 2017-02-21

SCOPE

This GUI module opens a screen that can select an output filename or send that content to a printer.

LOOK AND FEEL

The resizable Output screen has 2 components:

1. <u>Save table as CSV File</u>:
   - o "Browse" to file location (system dependant?)
   - o Filename (text field)
   - o "Save File" command button.
2. <u>Print table</u>:
   - o "Printer" command button (system dependent?)
   - o "Print" command button.

[Needs a mockup diagram here]

USED BY: Almost any module**.**

METHODS

The fundamental operations are:

1. Open the GUI_Output screen according to its saved Screen Layout (BR_PanelConfig)
2. Act on the command buttons.

AUXILIARY DATA USED

1. No direct access to databases.

REQUIRED SERVICES

1. GUI_PanelConfigEdit
2. SYS_FileBrowse
3. SYS_Printer
4. BR_Setting
5. BR_PanelConfig.
