GUI_AppLanguageDelete – Application Language Delete

Robin Lamacraft 2017-03-09

SCOPE

This GUI module displays a screen to enable deletion of an Application Language.

LOOK AND FEEL

The screen has 4 horizontal parts:

- The <u>heading section</u> shows the name of the Application Language
- A <u>collection of buttons</u> including "Configure", "Delete", "Apply", "Cancel" and "Output":
  - "Configure" opens a screen that allows the creation and re-use of screen content and layout
  - "Delete" <u>starts a search</u> to check that it is possible to delete an Application Language without causing inconsistency in the database:
    - This search lists on the screen the other objects that require the Application Language to continue to exist
    - This <u>scrollable table</u> has columns HRE-ID, Language Name
    - This search has 2 possible outcomes:
      - "Apply" is enabled on clicking it as no dependent objects were found. "Apply" removes the Application Language
      - "Output" - If there are other objects that require the Application Language to continue to exist, then "Output" can save this list for analysis as a file or to print it. There may be several reasons the Application Language can't be removed
  - "Cancel" does not delete the Application Language.

[Needs a mockup diagram here]

ACTIONS

The fundamental operations are:

1. Open Screen according to its saved Screen Layout (BR_PanelConfig)
2. Populate the property editor pane with values for the selected object
3. Populate the heading
4. Perform the search
5. Delete the Entity
6. Output the result of the search.

USED BY:

Tools > App Language > Delete

DATA CONTROLLED BY THIS MODULE

None.

REQUIRED DATA CONTROLLED BY OTHER MODULES

HRE-ID.

REQUIRED SERVICES

1. GUI_PanelConfigEdit
2. GUI_FieldTranslationEdit
3. GUI_Output.

4. BR_Setting
5. BR_PanelConfig
6. BR_AppLanguage
7. BR_EntityLink.

APPLICATION PROGRAMMING INTERFACE (API)
1. Need Details.
