GUI Icon-Configuration

Revision history

2018-05-12	Rod Thompson	Original draft

SCOPE

Icons are used extensively throughout the HRE application, in all window displays.

This document details use of the 'Configuration' icon. This may otherwise be known as a 'Toolbox' icon.

Each icon is in fact a button control, with a unique image that identifies its use without additional descriptive text

LOOK AND FEEL

Colour icons may be used in the main application window. (possible issues if user changes background palette)

Black & White icons will be used in sub-windows.

LABEL

Configure

IMAGE

File: config-B&W-V4(24x24)	File:

ACTIONS

Selection of this button will open a new window allowing the user to configure the current window.

A single operation of the icon button caused the defined action. Subsequent operations have the same action.

HOVER HINT

Configure
